OUR HISTORY

The DTH Group of Companies has a rich history rooted in innovation, expansion, and a commitment to quality. Founded in 1989 by our esteemed Chairman, Dr. P.H.G. Dharmasiri, the journey began with a modest tire shop. Driven by a vision to provide exceptional products and services, Dr. Dharmasiri embarked on a path that would transform the DTH Group into a leader in the rubber and plastic manufacturing sector in Sri Lanka.

In 1996, recognizing the growing demand for durable and reliable tire products, the company expanded by establishing a tire retreading factory. This strategic move allowed DTH to enhance its production capabilities and establish a foothold in the market. By 2002, the company's relentless pursuit of growth led to the opening of a new factory dedicated to producing a higher volume of quality products.

The years that followed saw DTH experiencing continual growth and diversification. In 2007, we ventured into manufacturing tires, tubes, reclaim rubber, and rubber compounding. This expansion solidified our expertise within the rubber manufacturing sector and positioned us as a prominent player in Sri Lanka.

We invite you to explore our DTH Eco Ceiling Panels, where quality meets sustainability, ensuring the best for both our customers and our environment.

In 2013, with a vision to broaden our horizons further, we ventured into the plastics sector, beginning with the production of PVC pipes, garden hoses, and PVC fittings. This marked a pivotal moment in our journey, demonstrating our adaptability and willingness to embrace new challenges.

Two years later, we took a significant leap forward by developing our manufacturing capabilities to include ceiling sheets. This diversification allowed us to utilize our extensive experience in production and quality control to enter a new market segment.

Today, with over 12 years of experience in manufacturing high-quality ceiling panels, our DTH Eco Ceiling Panels stand as a testament to our dedication to excellence. We have mastered the intricacies of production, ensuring that our products meet the highest standards of quality and sustainability.

As we continue to evolve and expand our product offerings, DTH remains committed to innovation and customer satisfaction. Our history not only reflects our successes but also our continuous pursuit of excellence and our mission to lead the industry in both rubber and plastic products.

ABOUT US

DRIVEN FOR EXCELLENCE & CHALLENGE

Welcome to DTH Group of Companies, a pioneering leader in rubber and plastic manufacturing in Sri Lanka. With a legacy that began in 1989, we have continually evolved, expanding our product lines and capabilities to meet the diverse needs of our customers.

Founded by our esteemed Chairman, Dr. P.H.G. Dharmasiri, DTH began its journey as a small tire shop, fueled by a vision of quality and innovation. Over the years, we have transformed into a multifaceted organization, specializing in the manufacturing of over 30 different types of rubber and plastic products. Our commitment to excellence is evident in every product we create, particularly our flagship DTH Eco Ceiling Panels.

At DTH, we pride ourselves on our state-of-the-art manufacturing facilities and the expertise of our dedicated team. With an unwavering focus on quality control and sustainability, we ensure that our products not only meet industry standards but also contribute positively to the environment. Our DTH Eco Ceiling Panels are designed to provide superior performance, aesthetic appeal, and durability, making them an ideal choice for various applications.

Our journey has been marked by significant milestones, including the establishment of tire retreading facilities, the manufacture of tires and tubes, and the expansion into the production of PVC pipes, garden hoses, and fittings. Each step has reinforced our reputation as a trusted manufacturer and supplier, committed to providing the highest quality products.

As we look to the future, DTH remains dedicated to innovation, customer satisfaction, and sustainable practices. We believe in building lasting relationships with our clients, understanding their needs, and delivering solutions that exceed their expectations.

Thank you for choosing DTH Group of Companies. We look forward to serving you with our exceptional products and services.

VISION

"To be a leading innovator in the rubber and plastic manufacturing industry, recognized globally for our commitment to excellence, sustainability, and customer satisfaction. We strive to enhance the quality of life through innovative products that meet the evolving needs of our customers while contributing positively to the environment."

"Our mission at DTH Group of Companies is to deliver high-quality rubber and plastic products that exceed customer expectations. We are dedicated to fostering a culture of innovation and continuous improvement, empowering our employees to achieve their best. Through sustainable practices and ethical business standards, we aim to create lasting value for our customers, stakeholders, and the communities we serve."

MISSION

PRODUCT OVERVIEW

DTH Eco Ceiling Panels are designed to offer an aesthetically pleasing and functional solution for various indoor environments. Made from high-quality materials, these panels are lightweight, durable, and eco-friendly, making them an ideal choice for residential, commercial, and industrial applications.

OUR CEILING MOULDING INTERIOR

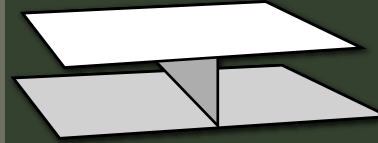

TOP MOULDING

Top molding ceiling accessories are essential design elements used for both wall and ceiling coverings, adding elegance and sophistication to any space.

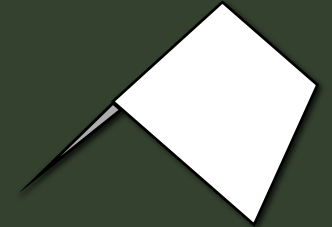

U MOULDING

U molding, also known as U-shaped molding, is a vital accessory used for finishing the edges of sheets in various applications.

H MOULDING

H molding, or H-shaped molding, is a crucial accessory used for joining two sheets together, providing a seamless and aesthetically pleasing transition.

L MOULDING

L molding, or L-shaped molding, is a versatile accessory designed for corner and edge applications, providing a clean and stylish finish for L-shaped coverings.

PRODUCTS ADVANTAGES

PVC ceilings are often used to cover existing ceilings or as a replacement for dropped ceilings in commercial buildings. PVC ceilings have several advantages. They are durable and resistant to water damage, moisture, and insects. They are also easy to install, low maintenance, and affordable.

ECO FRIENDLY

At DTH Eco Panel, we take pride in manufacturing premium PVC ceiling sheets that combine style, durability, and sustainability. Our eco-friendly products play a vital role in conserving the environment by saving millions of trees, offering a responsible alternative to traditional wood-based materials. Made from 100% recyclable PVC, our panels are not only designed to reduce environmental impact but also provide exceptional quality and versatility.

Choose DTH Eco Panel for modern, eco-friendly solutions that contribute to a sustainable future while enhancing your interiors with elegance and charm. Together, we can make a difference by choosing products that protect our planet.
